| <ul style="list-style-type: none"><li>Worked on data preprocessing, optimization modeling with Pyomo, and creating interactive dashboards in Power BI, while also developing PPE detection models, safety analytics dashboards, and IoT-based prototypes.</li><li>Building and integrating chatbot solutions (multilingual Q&amp;A, RAG, interview preparation bot), researching synthetic data generation and AI-driven safety applications.</li></ul> |                            |

## UNIVERSITY PROJECTS

### Face Mask Detection System [link](#)

- Architected a real-time Face Mask Detection system leveraging MERN stack, TensorFlow, OpenCV, and MobileNetV2, achieving 92% classification accuracy and processing up to 30 frames per second.
- Managed deep learning workflows via JS APIs and HTTP requests, achieving <100ms real-time inference, automated 10,000+ daily detection logs, and interactive monitoring dashboards.

### FIR Management System [link](#)

- Engineered a scalable web-based FIR registration system leveraging HTML, EJS, Django, and MySQL, facilitating secure, region-specific complaint submissions with streamlined data management.
- Integrated advanced JS APIs to provide interactive dashboards and visualizations, helping authorities analyze trends, monitor crime patterns, and improve response times by 20%.

### AD-Elevate AI [link](#)

- Developed an NLP-driven application leveraging Mistral-7B, Scikit-learn, and TensorFlow to analyze 5,000+ marketing campaigns, predict success probability with up to 88% accuracy, and generate trend scores for actionable insights.
- Implemented LLM-powered content enhancement with Dockerized CI/CD pipelines using GitHub Actions, YAML, MLflow, and Streamlit, cutting deployment time by 30% and boosting model inference speed 40%.

## PUBLICATIONS

- “Comparative Evaluation of Open-Source Large Language Models: LLaMA2 vs Mistral”, IEEE Xplore Digital Library (2026) [link](#)
- “A Survey on Multi-Agent LLM Frameworks for Data-Driven Dashboard Automation and Insight Generation”, IJARST (2026) [link](#)

## SKILLS

- Languages & Databases:** Python, C/C++, JavaScript, HTML, EJS, MySQL, Oracle SQL, MongoDB
- AI & ML:** Machine Learning, Deep Learning, NLP, Sentiment Analysis, MLOps, YOLO, Pyomo
- Web & LLMs:** MERN, Django, Flask, Streamlit, Flask; OpenAI, Gemini, LangChain, LiveKit, LLaMA, Mistral, Ollama, RAG, Chatbot & Prompt Engineering
- DevOps & Automation:** Azure, Docker, Kubernetes, CI/CD, GitHub Actions, MLflow, UiPath Studio Pro
- Data Visualization:** Power BI, Tableau, Excel
